

Pawan Kumar Singh

Gurugram, Sector 32 | +91 8090642038 | p1singh.sde@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack .NET Developer with almost 3 years of experience building scalable **ASP.NET Core Web APIs**. Experienced in **Clean Architecture**, **EF Core**, and **SQL performance optimization**. Worked on enterprise logistics and SaaS platforms handling **15K+** daily transactions. **AWS Certified Developer**.

Technical Skills

Languages: C#, JavaScript, Python, C, C++

Frameworks: ASP.NET Core/MVC, React, Angular, Entity Framework

Databases: SQL Server, Oracle 19c

Web: HTML, CSS, Bootstrap, REST APIs

Architecture: Clean Architecture, Microservices Concepts, CQRS (basic understanding)

Concepts: REST API Design, JWT Authentication, Middleware Pipeline, Database Indexing

Tools & Cloud: Git, GitHub, Docker, AWS, Azure DevOps, Postman, Visual Studio, VS Code, GitHub Copilot, ChatGPT, AI-assisted development tools

Professional Experience

Full Stack Developer | Augurs Innovation Pvt. Ltd.

Feb 2025 – Present

- Developed Service Configuration Platform using **ASP.NET Core 8**, implementing **30+ RESTful endpoints** with **JWT authentication** and RBAC for **500+ users**
- Optimized API response from **800ms to 400ms (50%)** using **EF Core AsNoTracking**, **SQL indexes**, and improved query design
- Contributed to TOA HRSystem built with **4-layer Clean Architecture** and **CQRS architecture using MediatR**; worked on API development, validation using **FluentValidation**, and custom middleware with **ProblemDetails (RFC 7807)**
- Implemented **Hangfire background jobs** for scheduled processes and retry policies, reducing manual compliance checks by **40%**
- Worked on **SignalR real-time notifications** and contributed to application performance improvements using caching strategies
- Improved API reliability by implementing structured error handling and standardized API responses across multiple endpoints

IT Officer (.NET Developer) | TCI Express

May 2023 – Jan 2025

- Developed **ASP.NET Core APIs** within a microservice-based logistics platform handling **15K+ daily transactions** across **50+ clients** with **99.9% uptime**
- Built transactional services using **ADO.NET**, **stored procedures**, **Serializable isolation**, and **RowVersion optimistic concurrency** achieving **12s response time**
- Worked with resilient communication patterns including **Polly circuit breaker** in backend services
- Developed route optimization engine using **Dijkstra's algorithm** with LINQ and **SQL geography types**, reducing logistics costs by **12% (5K+ daily calculations)**
- Configured **Serilog structured logging** with Elasticsearch improving issue diagnosis and monitoring

Full Stack Intern | Hoping Minds LTD

Jan 2023 – May 2023

- Built Hotel Booking SaaS with **ASP.NET Core 6**, **EF Core**, **JWT authentication**, and repository pattern improving response time by **35%** | [GitHub](#)

Key Projects

WMS – Warehouse Management System | .NET 8, Angular 15, SQL Server

Feb 2024 – Present

- Developed enterprise WMS system using **Clean Architecture** managing **10K+ SKUs** for **200+ concurrent users**
- Worked on a **CQRS-based architecture** using **MediatR** where **Dapper** was used for read operations and **EF Core** for write operations
- Implemented inventory operations with **RowVersion optimistic concurrency** ensuring consistent data updates across transactions
- Worked on a **multi-tenant architecture** using **Global Query Filters** and **SQL Row-Level Security**
- Implemented **Quartz.NET scheduled jobs** for automated expiry alerts and background processing

GoGreen – Fleet Management SaaS | ASP.NET Core 7, React 18, SQL Server

- Developed multi-tenant fleet management platform supporting **500+ vehicles** across multiple organizations
- Implemented **Hangfire background job scheduling** for automated vehicle maintenance workflows
- Developed backend APIs for vehicle tracking and reporting features while improving query performance for fleet dashboards

Education & Certifications

Master of Computer Applications (MCA) | Chandigarh University | CGPA: **7.5/10**

2021 – 2023

Bachelor of Computer Applications (BCA) | Punjab University | Percentage: **70%**

2018 – 2021

Certifications

- AWS Certified Developer – Associate** | Amazon Web Services | Valid through 2027
- AWS Certified Cloud Practitioner** | Amazon Web Services | Valid through 2027
